AMENDMENT

Commissioner for Patents
Washington, D.C. 20231

Sir:

RECEIVED
JUL 25 2002
TC 1700

The following remarks are respectfully submitted in response to the Office
Action dated February 20, 2002.

IN THE SPECIFICATION:

Please amend the specification as follows (**a marked-up version of the
specification as amended is attached hereto**):

On Page 5, please amend the paragraph between 16 and 22 as follows:

C1
C is an element for rendering the starting blank into martensite by
hardening/tempering treatment to provide the steel with hardness. If the C
content is less than 0.80% by weight, the surface hardness HRC of 62 or more
can not sometimes be obtained. If the C content exceeds 1.20% by weight, not
only the effect of C for improving the hardness is saturated but also residual
austenite tends to be formed.
